9/29/75

Dear Harold,

I have been more busy than ever with start of school, so buey in fact that I've had to reduce my work load by phasing out of paying job at Center for Govtal Responsibility. With that phased out (soon, hopefully) I'll be able to concentrate more on courses and take time for careful Law Review research.

I'm writing now because I have a minute before bed and wanted to tell you I expect to be in Baltimore this Monday, 10/6 to do a morning talk show arranged by my publisher. I'm not sure yet which, but pub. says it is the big morning show in Balt/Wash area at 9:00 am. I'll fly in Sun night and leave immediately after show. When my parents heard, they insisted on driving down to see me Sunday night, saying it was unthinkable that I'd be so close and they not see me. Whew! Pub insists he is making promo efforts, but not having much luck. Says they have tried almost every paperback pub in country with no success. By the way, I did Allen Dale's show, although the book had not reached him after 3 weeks! It was an experience!!!

I have this week's ENQUIRER and would have expected better after all the fuss. I thought it was part of the deal to tell readers how to get the book. As it is, no one knows even where you live or the correct name of book. Will there be another article?

Not a word from Jerry, which could mean many things. He could simply be waiting for an answer from Anson. Or he could have had some sort of run-in with Anson. Or with Jim and is afraid to contact me? It's just as well, but I'm curious.

Lucky deal with typewriter. Mine has been busted for over a week, and my father apparently cooked up a deal at Sears to get me a cheap electric, which arrived today and on which I'm now typing. That was a break!

I suppose you already have NEw Republic Szulc piece. There was serialization in Miami Herald, although I was able to get only one cop y of one day (story ran two parts, 2 days). I've not had a chance to copy the stories that have been appearing in NYT on JFK assass, but tell me if no one else is sending them to you.

Also, I just remembered a small note from you on annotation crediting me on 6.5mm fragment. No need, really, because I am given credit in the text, and that is sufficient for me.

Must run.

best,

Howard
